3D/2D CAD with Alibre Design

Course Outline:
- User interface
- Sketching: 2D and 3D
- Reference geometry
- Part Creation / Modification
- Assembly design
- Drawings: Views, Sections, Dimensions
- Sheet Metal design
- Bill of Materials
- Importing/Exporting data
- Team Design sessions online

Objectives:
- Develop 3D models and 2D detail drawings for mechanical design and manufacturing of precision machines and equipment

Who should attend:
- Mechanical engineers
- Manufacturing engineers
- Managers

Instructor:
Dr. Hatem Radwan
Purdue University, 1972
Over 30 years industrial experience in USA with IBM, Seagate, Hitachi and Sargent & Lundy
